Mecho®
INNOVATIVE DESIGN. TRUSTED PERFORMANCE.

High Design, High Performance Window Treatments

Mecho provides solutions that satisfy the functional and aesthetic needs of hotels, condominiums, conference centers, health clubs, dining facilities, and other hospitality facilities worldwide. Because no two applications are alike, Mecho offers a wide range of options and amenities that:

• Integrate into any décor to enhance your guest's overall experience

• Provides a clean, contemporary look for controlling daylight in guest rooms and public spaces

• Features shadecloths in a wide assortment of patterns, colors, and openness factors

• Includes ShadeLoc®, a complete blackout option for AV or guest rooms requiring complete daytime light blocking

• Includes the automated, integrated ElectroShade® system that provides optimal light and ideal comfort zones for any guest, day or night

• Are durable and easy to clean

CUSTOM IMAGE SHADES®

• Your design printed on our shadecloth

• Meet the ever changing design requirements in hospitality

• Your design available on solar or blackout shadecloth

• Unique, efficient, and cost-effective method for defining spaces, displaying artwork or photos

APPRECIABLE COST SAVINGS

Mecho provides many ways to enhance aesthetics and reduce operating costs through little or no maintenance.

• SnapLoc® spline attaches the shadecloth to the tube permitting the cloth to be easily removed for cleaning, maintaining, sanitizing, or even replacing

• Proprietary hardware components are commercial grade but simple to operate

• Our solar shades offer UV protection, which greatly decreases fading on furniture, and fabric

• WhisperShades and draperies that can be programmed to open or close automatically when a guest enters or leaves a room. WhisperShades can also be programmed to close automatically during the summer to reduce solar heat gain, and to open during the winter to increase heat gain—both to lower energy costs

GLOBAL AND LOCAL AUTOMATED CONTROLS

We provide a host of control options that include wall switches to touch screens, facilities management with global controls, or by guests with local manual overrides to control automated shades or draperies. Our control systems include:

• WhisperTrac™ a super-quiet and intelligent motorized track system for heavy- to medium-weight draperies

• SolarTrac® and SunDialer®, our state-of-the-art shading systems scientifically designed to automatically maximize natural daylight and increase energy efficiency ensuring guests always have a comfortable environment and views to the outside.

Our systems also allow the integration of shades into your central building management system to permit monitoring, and operating from any terminal in your facility. Options include full automation or individual guest room management of shades or draperies.
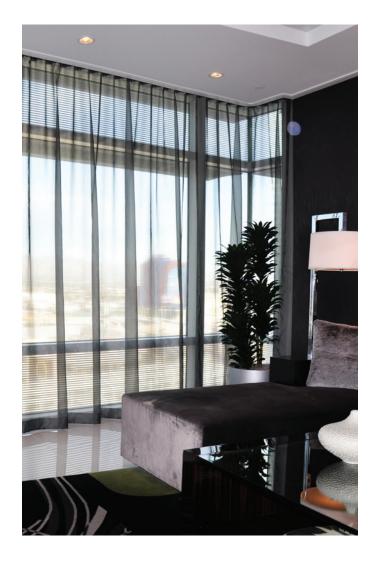

LIMITED LIFETIME WARRANTY

Lifetime Limited Warranty is defined to be the life of the project for which it was originally purchased, not to exceed 25 years from the date of shipment for specified products only. Warranty for unnamed hardware and fabrics shall not exceed ten years from date of shipment. Warranty for unnamed electronics shall not exceed five years.

The ElectroShade® system includes a limited lifetime warranty on all hardware and shadecloths, and a five-year warranty on motors and electronic controls. "Lifetime" connotes for the life of the interior project for which it was originally purchased, not to exceed 25 years."

Complete warranty information is available at mechoshade.com/resources/warranty-coverage/
